Fraction Dominoes
For two to six players

Object
The object of the game is to be the first person to play all their dominoes by matching them to dominoes already placed on the table.

Preparation
Place the dominoes on the table fraction side down and mix them thoroughly without turning them over. Each player draws four dominoes and holds them so that the other players cannot see them. The remaining dominoes are used as the draw pile one player is selected to go first.

Play
Play must start with a double, a domino with the same fraction (equivalent fraction) at both ends. If the first player does not have a double then he must take a domino from the draw pile, if this is a double he plays it, if not he keeps it in his hand. Play then passes to the next player who follows the same procedure until a double is played. When a double has been played, the next person plays a matching domino. If he cannot go he must take a domino from the draw pile, if he still cannot go, then play passes to the next person. When all the draw pile has been taken, play continues round but if you cannot play a matching domino play passes on to the next person. The first player to play all his dominoes is the winner. If, as sometimes happens, no-one can play a domino, the winner is the person with the least number of dominoes.

Extension
Complements Dominoes
Match the dominoes to total 1.
