

## The Korean Won

One Australian dollar is about the same as 700 Korean Won. Another way of writing this is AU\$1.00 = ₩700.

Alana is an Australian student on exchange in Korea. She is at a department store and wants to buy some presents for her family back home. All the price tags are given in Korean Won and she needs to make sure she doesn't spend too much. Can you convert each price tag to Australian currency for her? Round your answers to the nearest cents.

	₩	AU\$
Ginseng chocolates for Gran	₩6,500	
Silk scarf for Mum	₩8,000	
Silk neck tie for Dad	₩10,000	
Handkerchief for Pop	₩4,000	
Korean stamp for Sara	₩1,200	
Post cards for friends	₩500	

Alana has AU\$130.00 left to spend before she catches her plane back to Australia. Will this be enough to buy all the presents?
