

HSC: The Net Results

This professional development package investigates how teachers can assist HSC students to make effective use of the NSW HSC On-Line web site and improve their skills in interpreting, analysing and synthesising information. It has been written as a self-directed tutorial for teachers of all subject areas who have students working towards the HSC.

The module was distributed to schools in Term 2, 1999. Check with your librarian if you have not seen a copy.
